

PROJECT PROFILE

Ministry of Education (New Zealand)

Client

The Ministry of Education - New Zealand

Project

The Ministry of Education has responsibility over all public education properties. They manage, upgrade and construct new properties. And dispose of unusable property. Each school appoints a Project Manager to assess buildings, create management plans, apply for funding and perform maintenance work.

The Ministry needed a way to develop:

- A consistent process for condition assessments and audits of all schools
- A centralised and standardised online platform to store information about each school
- A strategic approach for capital works, to optimise funding
- An easy way to transfer knowledge to the Project Managers

Scope

- WebFM Consulting
- MPlan

Value Added

The initial program of 500 schools was so successful, the project was extended to the total portfolio of 2,500 schools
